

How Big and Healthy could your cattle look with yields of this Concentrated Mother Nature? (below)

Dry Matter Yield (lbs/acre)

Dry matter yield on Common Bermuda, World Feeder and
Crabgrass

Yield (lbs/acre)

3859.60

SumaGrow +
Fertilizer₃ 32.46.00

NPK (Control) 2375.80

Yield Increase over control 62% ↑

Brix Level

7.5%

SumaGrow + Fertilizer 5.00%

NH₄NO₃ 3.75%

SumaGreen Forage is a deliberate blend of Non-Genetically modified microbes targeted to create a thriving soil microbial life, growing healthier forages with higher yields (more than 20% in most cases) and reducing input costs (50% minimum fertilizer reduction highly recommended)

SumaGreen Forage grows a sweeter tasting, more nutrient dense product your livestock will seek out. The Higher the palatability and forage quality, the higher the intake. Cattle tested using SumaGreen Forage were noticeably healthier with higher weights. A liquid consortium, SumaGreen Forage may be added to irrigation systems, calibrated farm equipment or sprayers for convenient use. SumaGreen Forage's All Natural formula is safe for animals, people and the environment
