

Replacing Fertilizer saves money. When using ReeCourse Greens or Fairway formulas, you **MUST** reduce fertilizer use by at least 50%. Many golf courses elect to eliminate chemical fertilizers altogether.

No fertilizer run off! Eliminate fertilizer and you eliminate run off. If ReeCourse products run off, they actually bioremediate the water.

Greener Grass well into the fall. Michigan State University obtained 30+% higher chlorophyll levels with SumaGrow than comparables grown with chemical-based fertilizers.

Higher Brix levels result in fewer pest problems and fewer plant diseases. An independent PhD has verified grasses grown with ReeCourse products have higher brix levels and tend to be healthier.

Faster and higher germination rates on new grass.

Reduces infestations of nematodes and grubs.

Acts as a soil conditioner and regulates pH to make nutrients available in problem soils.

Easy Application

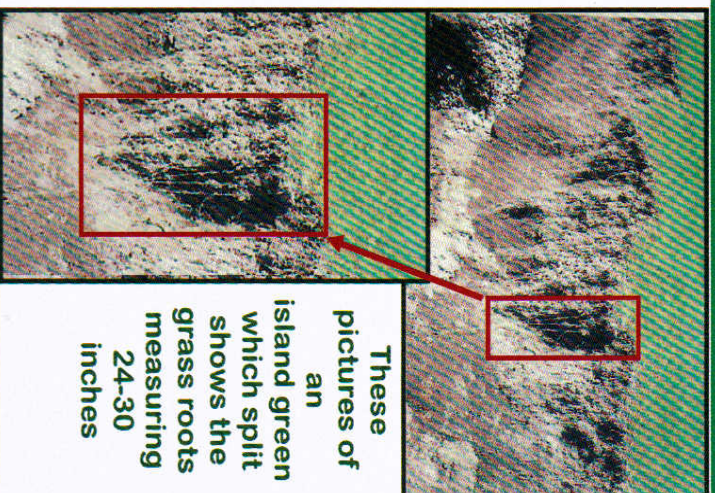

Liquid products can be mixed with any amount of water and sprayed on.

Products can be applied through the irrigation system or co-applied with fertilizers or pesticides.

Apply product once a month for greens and every-other month for fairways saving labor costs.

Grass Roots of an Island Green

Does your root systems even come close to these?

These pictures of an island green which split shows the grass roots measuring 24-30 inches

ReeCourse Products provide a major reduction in operating costs which *increases the bottom line!*

Better for you and Better for the Environment

ReeCourse
ReePlace. ReeDura. ReeStore.

Save money and protect your golf course with **ReeCourse** (OMRI Certified) an eco-friendly soil product composed of a unique blend of microbes and liquid humates.

ReeCourse Golf Products can save you money several ways:

- * **ReePlace** the need for Chemical -based fertilizer
- * **ReeDuce** Water Usage by 20+%
